

**EFFICIENT FLOW SOLUTIONS**

**FLEXLINK<sup>®</sup>**  
a coesia company

FlexLink delivers automated production flow solutions that increase the efficiency of your production processes and give a quick return on investment. We understand your requirements, and our target is to ensure your long-term yield and high return on investment.

Our focus is pre-fill, packaging and end of line with seamless integration of complex material handling solutions. FlexLink has the expertise necessary for GMP/QSR regulated industries. We collaborate with leading machine and equipment providers to deliver proposals based on your requirements and our know-how, effectively taking on the integration role when desired.

The solutions provide lower breakage losses and define an easy-to-follow flow that speeds up line clearance or compensates production stops and fine tunes the flow in all your lines. Our offer and capabilities support your ambitions to reach lean production in compliance.

# FULL CONTROL

Simulations allow testing the potential optimization to identify the right solution for your pharmaceutical production processes. When setting up new lines you can reduce the physical space needed and decrease validation time.

Elevate, accumulate, distribute, divert, pick-and-place as well as group products with our proven, reliable handling systems – also for steriles, cold chain, and freeze dry products. Products in different steps in the manufacturing processes are automatically handled, all according to your particular needs.

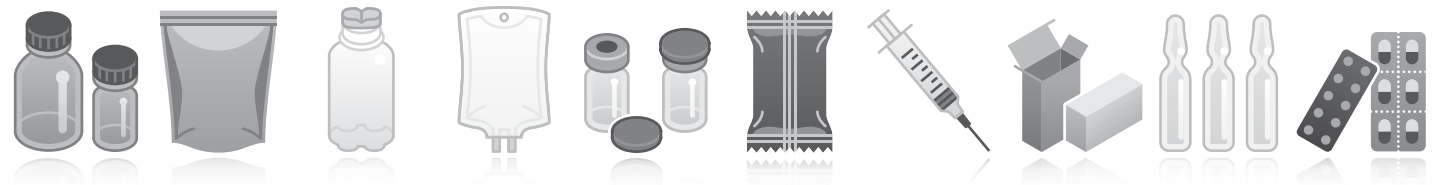

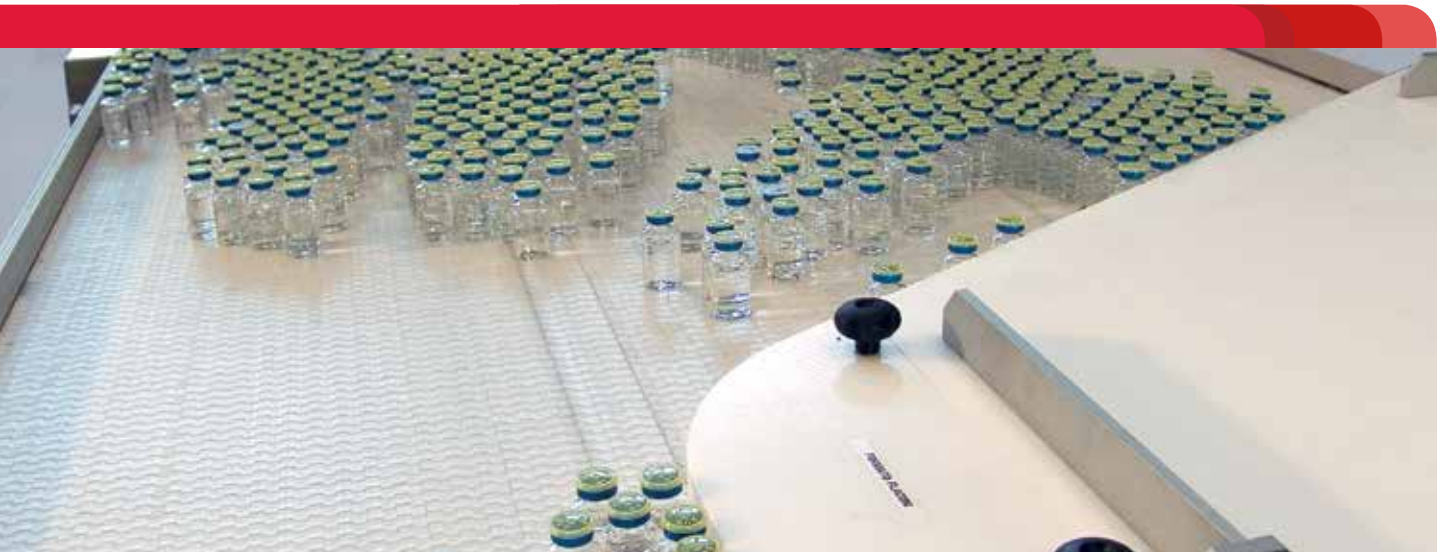

*We assist in implementing the optimal solution, whether it is manual, semi-automated or automated.*

FlexLink serves a wide customer base, ranging from local producers to global corporations. Since 1980 we have built global experience as a leading provider of high-end, standardized solutions to manufacturing industries.

## CONTINUOUS, DYNAMIC FLOW

With proven solutions you get the flexibility needed for handling both primary and secondary packaging. Maximize the floor space and allow easy operator access, with a compact integration of machines and equipment handling.

## SEAMLESS BALANCING

The line and conveyor speeds are seamlessly adjusted to balance the product flow between upstream and downstream machinery. This minimizes the throughput time and decreases the requirements for buffering. When you are ready for short line clearance and batch changes, we have the solutions to get you there.

## VERSATILE AND PRECISE

Increasing demands on secondary packaging and producing smaller batches makes versatility more critical than ever. We supply complete product handling capabilities throughout the production process, including pick-and-place and palletizing.

## A COMPLETE OFFER

We are experienced in managing short cycle times and sensitive products through a complete range of services - from analysis of the application to the final installation and commissioning.

Our experts collaborate with your engineers to develop new concepts and solutions tailored to your plant and the standards you are required to meet.

*Gentle handling of delicate products as blisters, bottles, syringes or ampoules reduces the waste.*

## FIND YOUR SOLUTION

Do you want to take significant steps towards higher efficiency?

Our experts will help you choose the solution best suited for your needs. The analysis is based on such factors as throughput, processes and the products' features as they appear in the line. Refined design and standardized functions ensure efficient solutions based on genuine industry know-how, high quality components, function modules and software. Services and support are integral parts of the unique offer as it ensures performance over time and a low cost of ownership.

FlexLink is a global provider of automated production flow solutions and the innovator of modern conveyor systems. Our solutions enable manufacturers, machine providers and system integrators to take control of efficiency – today and tomorrow.

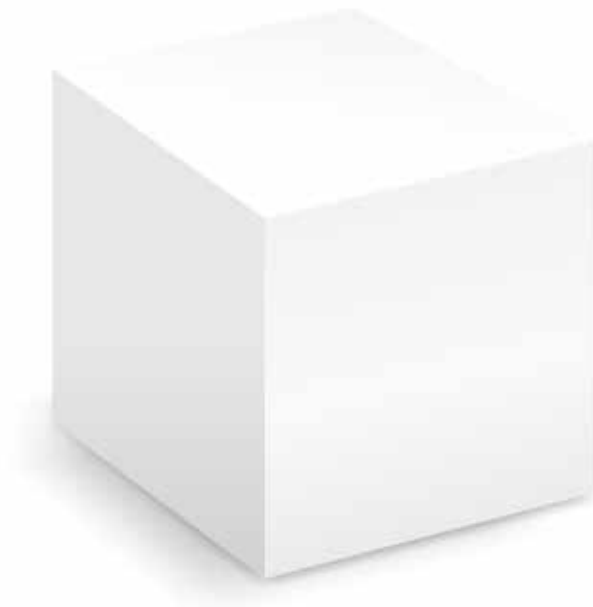

### LET IT FLOW

We are constantly focusing on ways to improve your production efficiency through:

- Considerable investments in R&D.
- A proven process for project fulfillment.

# THE START OF A PRODUCTIVE RELATIONSHIP?

Every component or system we design, every valuable service we offer is geared towards your production efficiency and the success of your business. Our dialogue will provide you with valuable and cost-saving answers. But we ask a lot of questions, certainly when we first meet. It is the quickest way to improving your total efficiency.

## **Are you looking for inspiration and ideas?**

Let's discuss the effects and performance that you are looking for. We can even arrange visits to installations relevant to your needs.

## **Do you want the bottom line?**

Our pre-studies use modern simulation and analysis tools to evaluate and verify potential improvements.

## **Do you need installation while maintaining your output?**

We offer first class commissioning to ensure rapid and seamless start-up. So you can maintain your existing deliveries and quickly satisfy your new customers.

## **Are you thinking about the long-term?**

Our After Sales service includes condition monitoring, preventive maintenance, emergency service and training. All to ensure you keep getting the most value from your production enhancement.

# coesia

[coesia.com](http://coesia.com)

Coesia is a group of innovation-based industrial solutions companies operating globally, headquartered in Bologna, Italy.

Coesia's companies are leaders in the sectors of:

- **Advanced automated machinery and materials**
- **Industrial process solutions**
- **Precision gears**

Coesia's customers are leading players in a broad range of industries, including Consumer Goods, Tobacco, Healthcare, Aerospace, Racing & Automotive and Electronics.
